

OrangeHRM Automation Testing Assignment

Manual & Automation Testing of Login and Employee Management Modules

This project focuses on automating and testing the login and employee management modules of the OrangeHRM application. Both manual and automation testing were performed to ensure the reliability and usability of the system.

Section 1: Manual Testing Scenarios

1. Login Functionality - Manual Test Cases

Test Case ID	Test Steps	Expected Result	Actual Result	Status
TC_Login_01	Open login page	Login page loads with username & password fields	As expected	Pass
TC_Login_02	Enter valid credentials and click login	User logs in and lands on Dashboard	As expected	Pass
TC_Login_03	Enter invalid username	Error message appears	As expected	Pass
TC_Login_04	Enter invalid password	Error message appears	As expected	Pass
TC_Login_05	Leave username blank	Error message appears	As expected	Pass
TC_Login_06	Leave password blank	Error message appears	As expected	Pass
TC_Login_07	Use special characters in username	Error message appears	As expected	Pass
TC_Login_08	Attempt multiple wrong logins	System blocks or shows security message	As expected	Pass

2. Identified Bugs & Usability Issues in Login Page

Issue ID	Description
UI_03	No Password Visibility Toggle - There is no icon to view the password typed
UI_03	No CAPTCHA - Allows multiple login attempts without protection
UI_03	Poor Error Highlighting - Error messages not prominent enough

3. Managing Employees - Test Scenarios (View, Update, Delete)

A. Add New Employee - Manual Test Cases

Test Case ID	Test Steps	Expected Result
TC_Emp_01	Click Add Employee and enter valid details	Employee is added successfully
TC_Emp_02	Try adding without first/last name	Error message displayed
TC_Emp_03	Upload large (>1MB) photo	Shows error "Attachment Size Exceeded"
TC_Emp_04	Use numeric/symbols in names	Accepts it (Validation issue)
TC_Emp_05	Enter >30 characters in names	Shows validation error
TC_Emp_06	Skip login details and save	Adds employee successfully
TC_Emp_07	Try using duplicate username	Shows username already exists
TC_Emp_08	Invalid date of birth (e.g., 1970)	Accepts - No validation

B. Edit Employee Details - Manual Test Cases

Test Case ID	Test Steps	Expected Result
TC_Edit_01	Edit employee name & save	Data updates successfully
TC_Edit_02	Enter invalid characters in name	Should restrict (currently allows)
TC_Edit_03	Try saving without mandatory fields	Error message appears
TC_Edit_04	Try editing to duplicate employee ID	Error message shown

C. Delete Employee - Manual Test Cases

Test Case ID	Test Steps	Expected Result
TC_Delete_01	Click delete icon next to employee	Confirmation prompt appears
TC_Delete_02	Confirm deletion	Employee removed from list
TC_Delete_03	Cancel deletion	Employee remains on list

Section 2: Automation Script using POM

Workflow Steps Automated:

1. Login with valid credentials
2. Hover on PIM and click it
3. Click on Add Employee
4. Add 3-4 employee records
5. Navigate to Employee List and verify each name
6. Print "Name Verified" if found
7. Log out

Automation Stack:

 Project Repository:

GitHub Link: <https://github.com/karunarunjula7/orangehrm-automation-assignment>

- **Language:** Python
- **Tool:** Selenium WebDriver
- **Framework:** Page Object Model (POM)

Conclusion

This assignment helped demonstrate skills in both manual and automation testing using Selenium with POM structure. All test scenarios were successfully validated.
